# District PMTCT and MCWH Structure (1 min)

# Antenatal Care

Bottlenecks	Causes	Progress
<p>Late ANC booking Pregnant women</p> <p><b>Baseline:20%</b></p> <p><b>Target:50%</b></p> <p><b>Actual:31%</b></p> 	<p>Clients consult private medical practitioners to confirm pregnancy and delay attending state clinics.</p> <p>Lack of understanding of the benefits of early ANC booking.</p> <p>Negative staff attitude Lack of “Flexi-Time”</p> <p>Teenagers usually hide pregnancy until very late</p>	<ul style="list-style-type: none"> <li>•Maternity case records were distributed to GPs in all municipalities. <b>To monitor the use.</b></li> <li>•<b>79 schools visited to create awareness on pregnancy and importance of early booking.</b></li> <li>• Preparing a research proposal to investigate factors influencing timing of initiation of ANC in Zululand District</li> </ul>
 <p><b>KwaZulu-Natal Department of Health</b></p>		

# PMTCT

Bottlenecks	Causes for not 100%	Progress towards 100%
<p>Low HIV Testing Rate for Pregnant women</p> <p><b>Baseline: 91%</b></p> <p><b>Target: 95%</b></p> <p><b>Actual: 97%</b></p> <p><i>(aiming for 100%)</i></p> 	<ul style="list-style-type: none"> <li>-P/Ns do not do VCT in the absence of HIV Counselors</li> <li>-Negative staff attitude</li> <li>-Long waiting hours due to shortage of P/Ns</li> <li>Lack of integration of services due to inadequate physical space</li> <li>Limited understanding of benefits of PMTCT by clients</li> </ul>	<ul style="list-style-type: none"> <li>• Mobile clinics were supported with gazebos and HIV counselors.</li> <li>• Monitoring and feedback.</li> <li>• QI implemented in Ulundi and Nongoma.</li> <li>• Social mobilisation</li> </ul>

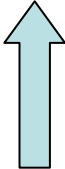

# PMTCT cont

Bottleneck	Causes	Progress
<p>Low proportion of HIV pos pregnant women receiving CD4 testing</p> <p><b>Baseline :92%</b>  <b>Target:95%</b>  <b>Actual: 80%</b></p> <p><i>( Baseline questionable because of the quality at the time of planning. )</i></p> 	<ul style="list-style-type: none"> <li>•Collection of specimens from clinics to join the courier on Fridays</li> <li>•Poor Data management</li> </ul>	<ul style="list-style-type: none"> <li>• Arrangements have been made for specimens to be taken to NHLS by hospital transport on Fridays.</li> <li>•NHLS technician is on standby to conduct CD4 Test over weekends</li> <li>• QI programme implemented at Ulundi municipality with the help of CRH.</li> <li>•District implementing data quality improvement plan.</li> </ul>

# PMTCT cont

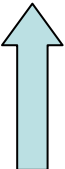

Bottlenecks	Causes	Progress
<p>Low proportion of HIV pos pregnant women receiving NVP during labour.</p> <p><b>Baseline:65%</b></p> <p><b>Target:95%</b></p> <p><b>Actual:74%</b></p> 	<ul style="list-style-type: none"><li>•Poor documentation</li><li>•Reluctance to record medication as taken if administration was not directly observed</li></ul>	<ul style="list-style-type: none"><li>•Some improvement has been noted after strengthened monitoring and feedback</li><li>•Strengthen supervision.</li><li>•Emphasize recording of NVP taken as reported by the client</li></ul>

# PMTCT

Bottlenecks	Causes	Progress
<p>Poor fast tracking of eligible HIV Pos pregnant women on HAART.</p> <p><b>Baseline:12%</b>  <b>Target:95%</b>  <b>Actual: 61%</b></p> 	<ul style="list-style-type: none"> <li>•<u>Nongoma still very low because of failure to attract and retain critical staff.</u></li> <li>•Long CD4 TAT at most clinics( Ceza, Nkonjeni, eDumbe, Itshelejuba).</li> <li>•Late booking for ANC</li> <li>•Poor recording and communication of CD4 results</li> <li>•WHO Clinical staging not done</li> <li>•Clients not reaching CCMT sites due to financial constraints.</li> <li>•High attrition rate of doctors in Nongoma and Ulundi</li> </ul>	<ul style="list-style-type: none"> <li>•10 PHC clinics were supplied with Sim card system for retrieval of CD4 results by NHLS . Currently being expanded to 10 more clinics.</li> <li>• Clinics without sms facilities phone their hospitals weekly for results</li> <li>•Drivers were trained on handling specimens.</li> <li>•Thembumusa clinic is initiating clients on HAART-roving team.</li> <li>•Employment of dedicated professional for ARV clinics by EGPAF</li> </ul>

# PMTCT cont

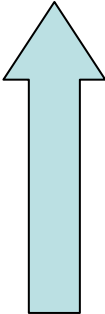

Bottlenecks	Causes	Progress
<p>Low % of HIV exposed infants tested for PCR at six weeks</p> <p><b>Baseline: 15%</b></p> <p><b>Target: 95%</b></p> <p><b>Actual: 64%</b></p> 	<ul style="list-style-type: none"> <li>• Need to obtain consent for PCR testing from biological parent.</li> </ul> <p>Poor documentation and communication for continuity of care.</p> <ul style="list-style-type: none"> <li>• Tendency to focus on immunisation only</li> </ul>	<ul style="list-style-type: none"> <li>• Mothers sign consent for PCR prior to discharge from Post natal wards.</li> <li>• Implemented the referral system from post natal wards to PHC facilities.</li> <li>• Quality Improvement</li> <li>• CMT in clinic facilitation project</li> </ul> <p><b>CHWs over 700 PMTCT clients on individual follow up schedule. This a possible best practice to be rolled out but the limitation is that it cannot be sustained using CHWs. To consider developing capacity of full time staff .</b></p>

# INTRAPARTUM CARE

Bottlenecks	Causes	Progress
<p>High maternal Mortality Rate</p> <p>Baseline:159/100000</p> <p>Target:145/100 000</p> <p>Actual:220/100 000(10 maternal deaths)</p>	<ul style="list-style-type: none"> <li>•Poor monitoring of the progress of labour</li> <li>•Insufficient/lack of functional equipment</li> <li>•Lack of skills in managing obstetric emergencies</li> <li>•High staff turn over (incl staff rotation)</li> <li>•Suboptimum ante natal care as well as management of labour.</li> <li>•Impact of HIV and AIDS</li> <li>•Patient related causes including delays in seeking medical care.</li> <li>•Most clinics not conducting deliveries- delays in accessing delivery supervised by health professional</li> </ul>	<ul style="list-style-type: none"> <li>•On the job training on the use of Partogram( recording, interpretation and action)</li> <li>•Provision of functional equipment and required consumables e.g. CTG and CTG paper.</li> <li>•In service training on managing Obstetric emergencies.</li> <li>•Implementation of BANC</li> <li>•Monthly PMR meetings at all District hospitals</li> </ul>

# CHILD HEALTH SERVICES

Bottleneck	Causes	Progress
<p>Low vitamin coverage 12 to 59months</p> <p>Base line : 24%</p> <p>Target : 50%</p> <p>Actual : 46%</p> 	<ul style="list-style-type: none"> <li>• Well baby clinic concept not fully implemented leading to missed opportunities.</li> <li>• Children already at schools or early education centres.</li> </ul>	<ul style="list-style-type: none"> <li>• Close monitoring and support.</li> <li>• Mobile clinics and School Health services to provide Vit A at pre schools</li> </ul>

# A PLAN - QI

## *QI Model*

- Implemented in Ulundi and Nongoma municipalities
- Ulundi is supported by CRH -1full time QI mentor and 1 coordinator
- Nongoma receives support from EGPAF- mentorship done by the Programme Officer
- Training on the model in April- Ulundi and June – Nongoma

# A PLAN – QI ( Cont)

- **Approach-** Ulundi
- Coaching and mentorship at 2 PHC clinics and PHC supervisor and HAST Coordinator rolled it out to the rest (4) including Mobile
- Nkonjeni had facilitation in 4 clinics and now all 11 clinics receive facilitation by QI Mentor
- Step by step analysis of the PMTCT Process using data to identify problems
- Use a range of methods to address them e.g. process mapping, QI teams, PDSAs Run charts

*K*waZulu-Natal Department of Health

# A PLAN - QI

## Taking QI Forward

- All district programme coordinators to be coached on QI so as to support sub districts.
- PHC supervisors to drive QI in clinics and Operational Managers in the hospitals
- Supervisors from other sub districts to be seconded to participate in mentorship site visits for coaching.
- Support with QI mentorship from partners if possible.

*K*waZulu-Natal Department of Health

# OVERVIEW PMTCT A PLAN CONT.

Early changes thus far:

- Use of process map emphasised counselling and testing before palpation
- Implementation of Plan Do Study Act Cycles (PDSA) led to
  - Improvement in transportation of specimens to laboratory
  - TAT CD4 results improved from 3 weeks to one week
  - Improved communication between clinics and mother hospital
  - Clinics are now able to identify problems and work out solutions on their own( Ceza)
- Data are starting to match
- PHC Supervisor (Ceza) confident , can sustain the QI programme.
- Nkonjeni had a longer break in period . Also making progress.
- Different approach used in Nongoma
- Process is very slow in Nongoma

*K*waZulu-Natal Department of Health

# SOCIAL MOBILIZATION

- Started with Community dialogues in Nongoma and Ulundi municipalities
- 32 CHWs Trained on in clinic facilitation by Community Media Trust (CMT)- placed in 12 clinics in Nongoma and 4 in Ulundi
- Two CMT facilitators mentoring and supporting implementers.
- It was included in the KPAs of existing outreach programmes workers e.g. school Health, CHWs.
- 5 Community Health Facilitators received CMT training- to cascade to the rest of CHWs
- Door to door IEC and open days
- Focus groups at the Lutheran Church in Ulundi at Women's Conference.
- Church youth was addressed on PMTCT.

*K*waZulu-Natal Department of Health

# SOCIAL MOBILIZATION

- District Health Promotion coordinator at District level lead SM and PHC supervisors at sub district level
- Taking in clinic facilitation forward
  - Roll out to all sub districts
  - Community Health Facilitators to train and mentor CHWs who would give one day a week for in clinic facilitation.
  - Request CMT to train HIV Counselors on in clinic facilitation

*K*waZulu-Natal Department of Health

# Priorities for 2010/11 ( 4 mins)

- **Approach-** Intensify Community mobilization using flagship programmes and QI and on site mentorship
- National- Policy directives. M and E
- Partners- Expand QI support to other sub districts
  - Support with additional resources
- Province- Resource allocation, M and E
- Districts and sub districts
  - Implementation, mentorship and M and E
- Focus for 2010/11
  - Improve data management at all levels
  - Roll out social mobilisation and QI to the entire district
  - Improving telecommunication infrastructure for PHC clinics
